

CHILDREN'S WRAPAROUND TEAM (CWT)

Support & consultation for Mason and Thurston County families

Family guided one hour consultation and guidance with community subject matter experts: Parents with lived experiences, service providers, schools, behavioral health, funders, regional allied systems, etc.

Support stabilization of children/youth at home and in their community who are experiencing difficult behavioral health challenges. Link families and youth to higher levels of care when medically necessary.

We encourage families to reach out as soon as needs are identified to determine if CWT would be helpful.
